*"Gives 64 users some of the sophistication that was
previously the sole province of computes costing five times
as much."*

Commodore Microcomputer.

Integrated Machine Language Word Processing, Spell Checking and File Management gives you performance in data management without disk swapping and lengthy individual program loads.

Word Processing

Finally. An inexpensive word processor that gives you all the options usually found only in expensive software. Like custom printing features, moving copy between pages, a unique "scratchpad" feature, and more.

File Management

Allows you to store and organize mailing lists, research and homework notes, personal records, and more. You can manipulate your data in a variety of ways and can even move the information to an entirely new file without retyping it.

Spell-Checker

Improve the quality of your letters and documents by checking them against this 30,000 word dictionary. You can even adapt the dictionary to your personal vocabulary and jargon with an additional 5,000 word list which you control.

PRINTED WORD + FILE

Manipulate your documents and files using "a new set of standards for software integration that other manufacturers will surely want to match."
(RUN Magazine)

Finally. A machine language word processing and file management system with options usually found only in expensive software. FAMILY COMPUTING says about Tri Micro software, "The beauty is that at any time you can go from one program to another without information loss." No fussing with loading various disks. No time lost in creating data transfer files.

The really exciting thing about integrated software is that you can concentrate on solving problems again and again. Use the word processor to prepare professional looking documents utilizing an 80-column scrolling screen format. Create boilerplates using the unique "scratchpad" feature and the merge capability. You can use shadow or bold printing, underlining and centering, superscripts and subscripts — any features which your printer supports. And the Search and Replace function makes editing almost enjoyable.

Organize file information, then use identifying keys to produce letters and reports without retyping. The free-form "mail-merge" feature makes printing labels or forms a simple task. You can select a set of files, delete repeated records, sort by zip code or sort up to three fields at a time. This means that managing mailing lists, or the family health records, research notes, or any other information which needs taming, is just a few keystrokes away.

The easy to use spelling checker eliminates frequent spelling errors. Misspelled words are highlighted and you are allowed to correct the word, leave it unchanged or add it to your dictionary. You can even adapt the dictionary to your personal vocabulary and jargon.

It's really all you've ever wanted in a software system. Yet, this exclusive copyrighted program has never been available at such a low price.

Get acquainted with the whole line of **French Vanilla** HOMEWARE** soon. It's all affordable, high quality, copyrighted software, complete with documentation. It's something you just can't afford to pass up.
